SUMMARY

Fullstack Engineer with 5 years of production experience in fintech and B2B SaaS, holding an MSc in Software Engineering. Comfortable owning features end-to-end, from architecture and state management to shipped, performant UI, including data-heavy dashboards, real-time interfaces, and payment flows. Uses AI-assisted tools daily as part of the development workflow. Experienced building and maintaining design systems and component libraries used across entire product teams, with a track record of leading code reviews and mentoring junior developers.

TECHNICAL SKILLS

Frontend: Vue 2/3, React, Next.js (App Router), Nuxt 3/4, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SCSS, Shadcn UI, Radix UI, MUI, styled-components, Vuetify, Quasar

Backend: Node.js, NestJS, Django, Django REST Framework (DRF), Python, PostgreSQL, Redis

State & Data: Pinia, Vuex, Redux Toolkit, TanStack Query, Zustand, React Hook Form, Zod, RTK Query

APIs & Integration: REST, GraphQL, gRPC, WebSockets, Server-Sent Events, Axios, ofetch

AI-Assisted Development: Claude Code, Cursor, Codex, v0, custom AI agents, agentic coding

LLM APIs: OpenAI API, Google Gemini API

Security & Auth: Auth0, JWT, XSS/CSRF mitigation, defensive handling of sensitive data

Content & SEO: Astro, Alpine.js, MJML, SendGrid, reCAPTCHA, meta/OG tags, sitemaps, structured data

Data Viz & Tables: D3.js, AG Grid, Recharts, ApexCharts, Chart.js

Testing: Playwright, Vitest, Jest, Cypress, React Testing Library (RTL), TDD, BDD, E2E

Infra & Tooling: AWS (S3, CloudFront, Route 53, IAM), Docker, GitHub Actions, GitLab CI/CD, Vite, Webpack, Bun, Storybook, ESLint, Prettier, Git

WORK EXPERIENCE

Senior Fullstack Engineer, Golden Ratio Exchange (GRX) Feb 2026 – Aug 2026
Swiss fintech - crypto-fiat payments, institutional RWA tokenization, retail exchange.

- Owned the architecture and delivery of the public-facing website end to end, hitting Lighthouse 95+ and sub-1.5s LCP on mobile.
- Built core deposit, withdrawal, and transaction-status flows for a multi-currency crypto banking product used by 24+ cryptocurrencies, managing complex, multi-step async state, integrating real-time deposit and transaction status updates, and surfacing AML risk scoring clearly per transaction for operations review.
- Designed and shipped a shared component library with full documentation, driven by design tokens from Figma, cutting visual inconsistencies across GRX products by roughly 70%.

Senior Fullstack Developer, EZCLOUD Dec 2021 – Feb 2026
US-based B2B SaaS & e-commerce intelligence company.

- Owned interface design directly across every product built at EZCLOUD, with no dedicated designer on the team: no mockups, no handoff, deciding layout, flow, and UI choices myself while building.
- Built a B2B analytics platform for Amazon sellers, turning raw sales, ad, and inventory data into financial dashboards: a profitability engine accounting for platform fees, cost of goods, and ad spend, inventory forecasting with restock alerts, and per-SKU ad performance. Handled \$10M+ GMV and 100,000+ orders through virtualized, cursor-paginated tables with live WebSocket updates, cutting render time by roughly 45%.
- Built and owned the operator dashboard for a live network of 240 distributed air-quality sensors across Berlin: a sensor map with pollution-level color coding, a watchlist with trend sparklines, and a history chart spanning day-to-month ranges, backed by a real automated test suite including cross-browser and accessibility checks.
- Built a donation and fundraising platform for nonprofits, charities, and religious and educational institutions, solo, start to finish: checkout and donation forms, campaign pages, donor management with segmentation, recurring donations, embeddable donation widgets, white-label campaign landing pages, and automated tax-receipt generation.

EDUCATION

MSc Software Engineering,
Kherson State University 2024 – 2025

BSc Software Engineering
Kherson State University 2020 – 2024
