SUMMARY

Senior Frontend Engineer with 4.5 years of production experience in fintech and B2B SaaS, holding an MSc in Software Engineering. Comfortable owning features end-to-end, from architecture and state management to shipped, performant UI, including data-heavy dashboards, real-time interfaces, and payment flows. Uses AI-assisted tools daily as part of the development workflow. Experienced building and maintaining design systems and component libraries used across entire product teams, with a track record of leading code reviews and mentoring junior developers.

TECHNICAL SKILLS

Frontend: Vue 2/3, React, Next.js, Nuxt 3/4, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SCSS, Shadcn UI, Radix UI, MUI, Vuetify, Quasar

State & Data: Pinia, Vuex, Redux Toolkit, React Query / TanStack Query, Zustand, React Hook Form, Zod, RTK Query

APIs & Integration: REST, GraphQL, gRPC, WebSockets, Server-Sent Events, Axios, ofetch

AI-Assisted Development: Claude Code, Cursor, GitHub Copilot, custom AI agents, agentic coding

Security & Auth: Auth0, JWT, XSS/CSRF mitigation, defensive handling of sensitive data

Content & SEO: Astro, Alpine.js, MJML, meta/OG tags, sitemaps, structured data

Testing: Playwright, Vitest, Jest, Cypress, React Testing Library, TDD, BDD, E2E

Backend: Node.js, NestJS, Django, Django REST Framework, Python, PostgreSQL, Redis

Infra & Tooling: AWS (S3, CloudFront, Route 53, IAM), Docker, GitHub Actions, GitLab CI/CD, Vite, Webpack, Bun, Storybook, Git

WORK EXPERIENCE

Frontend Engineer, Golden Ratio Exchange (GRX)

Feb 2026 – Jul 2026

Swiss fintech - crypto-fiat payments, institutional RWA tokenization, retail exchange.

- Owned the architecture and delivery of the public-facing website end-to-end, hitting Lighthouse 95+ and sub-1.5s LCP on mobile.
- Built core deposit, withdrawal, and transaction-status flows for a multi-currency crypto banking product used by 24+ cryptocurrencies, managing complex, multi-step async state and integrating backend services with real-time deposit and transaction status updates.
- Handled loading, error, retry, and edge-case states throughout the payment flows, with AML risk scoring surfaced clearly per transaction for operations review.
- Designed and shipped a shared component library with full documentation, driven by design tokens from Figma, cutting visual inconsistencies across GRX products by roughly 70%.
- Worked within an international team of 2 frontend, 2 backend engineers, QA, a team lead, PM, and designer, taking part in requirements gathering and occasionally leading that process directly with the client.

Frontend Engineer, EZCLOUD

Dec 2021 – Jan 2026

US-based B2B SaaS & e-commerce intelligence company.

- Built an enterprise Amazon seller BI dashboard with \$10M+ GMV from scratch, including back-office style monitoring views for financial and operational data. Cut initial render time by roughly 45% using virtualized tables and cursor-based pagination.
- Developed a product investment platform pulling live Amazon marketplace metrics against supplier data feeds in real time, building a CSV ingestion and validation pipeline that handled malformed data and cut time-to-interactive by around 30%.
- Delivered an ad campaign management tool with geospatial ad-spend visualization and high-frequency data rendering. Introduced unit testing and structured code review, cutting regression bugs by roughly 50% while mentoring two junior developers.
- Worked in an international team communicating in English, involved in requirements gathering, client communication, and product demos.

EDUCATION

MSc Software Engineering,
Kherson State University 2024 – 2025

BSc Software Engineering
Kherson State University 2020 – 2024
